

SNMP Card

Integrated with ViewPower software, SNMP Manager works as an enhanced communication solution for UPS monitoring and management. This SNMP manager card allows remote monitor and manage multiple UPSs from anywhere with internet access. ViewPower software will leverage internet capability of SNMP manager to remotely program or shut down UPSs.

- Allows control and monitoring of multiple UPSs through RJ-45 network connection.
- Real-time dynamic graphs of UPS data (voltage, frequency, load level, battery level).
- Warning notifications via audible alarm, broadcast, mobile messenger, e-mail and SNMP traps.
- Historic data log stored in centralized PC database.
- Simple firmware upgrade with one click.
- Password security protection and remote access management.
- Supports optional environmental monitoring detector for temperature, humidity and smoke.
- 2-year product warranty.

Modbus Card

- Real-time control and monitoring of multiple UPSs or inverters via RS-232/RS-485 communication port.
- Supports Modbus RTU protocol.
- Built-in dip switch for RS-232 and RS-485 configuration.
- Provides MODBUS functions including read Holding Registers and write Registers.
- Provides surge protection.

SOFTWARE

ViewPower Pro for UPS

ViewPower Pro is UPS management software which is perfect for home users and enterprises. It can monitor and manage from one to multiple UPSs in a networked environment including LAN, INTERNET and Modbus networks. Integrated with Shutdown Wizard, it can not only prevent data loss from power outage and safely shutdown systems, but also store programming data and scheduled shutdown UPSs. All UPS working data and event records can be kept in local database system.
